

Tips for Successful Loading and Securing E-Z Box

- **Number or label each box** (e.g. Bath, Master BR, etc.) for easy identification.
- **Pack blankets and linens inside appliances** to save space.
- **Leave clothing in bureau drawers** to save space.
- **Tighten lids** on all toilet articles, liquid cleaners, etc.
- **Wrap fragile items** like glasses and dishes in bubble wrap or newsprint and pack in dish pack boxes. Mark boxes “FRAGILE” as needed.
- **Hold out those things you’ll need *soonest*** at your new place (tools, vacuums, cleaning supplies, etc.) and load them near the E-Z Box door.
- Starting at the back of your E-Z Box, **fill it from side to side** and then work your way up (see Fig. 1). **Do not** pack all the way to the ceiling.
- **Heavier boxes (books, e.g.) should be on bottom**, lighter boxes on top.
- **NOTE:** If your E-Z Box is equipped with a Humi-Rid™, **do not place items** in direct contact with it, or block the filter-changing port above it. Air flow around the Humi-Rid must not be blocked.
- **Fill all available spaces** with soft items like blankets, mattresses, and cushions to keep the load from shifting during transport. Intermingle appliances, furniture and boxes so that the tightest fit is achieved.
- If possible, **stand sofas and loveseats on end**. Mirrors, paintings and other flat items may fit in the spaces between the ribs of the E-Z Box.
- **Use adjustable tie-down straps** to secure your loaded goods (Fig. 2).
- As your load nears the door, hook straps to the *last pair of ribs* and **secure the load in place** before closing the door. (This is a good place to use a mattress as a “barrier.” Make sure the mattress is strapped tightly in place.) Keep all items **at least 6 inches from the door**.
- **Secure your E-Z Box door** with your FREE cylinder lock once it’s loaded (Fig. 3). Keep *at least one key with you* at all times.
- **REMEMBER:** As per your contract, *E-Z Box assumes no responsibility* for the packing of your unit, so pack and secure it carefully to avoid any shifting of contents during transport.
- **CAUTION:** As per your contract, *it is unlawful to transport or store any hazardous or flammable materials* in the E-Z Box.
